FOR IMMEDIATE RELEASE

Global Sales and Service Centers Support Customers World-wide

Energy Recovery, Inc. (ERI®) invests in local regional sales and service offices

San Leandro, Calif., August 13, 2007 – Energy Recovery, Inc. (ERI), the global leader of ultra-high-efficiency energy recovery products and technology for reverse osmosis (RO) desalination enhances local sales and service centers to customers world-wide.

ERI establishes local presence in strategic areas with several sales and technical centers covering six continents. With offices in Dubai, UAE; Madrid, Spain; Shanghai, China and Sunrise, Florida, the company is well positioned to provide regional sales and service needs to its growing customer base. The company also has sales and service representatives in Australia, India, Korea, North Africa, Mexico, Taiwan and the Caribbean.

The company's European Sales and Technical Center, located in Madrid, Spain provides valuable local support to mainland Spain, the Canary Islands and Europe. Similarly, Asian community clients are well served by expert technical services and sales personnel located in Shanghai, China. Our Middle East and North Africa clients are supported by ERI's recently established office in Dubai, as well as technical services managers in Egypt. The company's headquarters, based in the San Francisco Bay area, remains as the primary location for research & development and manufacturing capabilities, as well as sales and marketing functions.

Earlier this year, ERI was awarded the Global Water Awards 2007 Environmental Contribution of the Year by desalination industry leaders. In addition, the Company was named the 2006 and 2007 U.S. Export-Import Bank and US Commerce Department's "Environmental Exporter of the Year," an honor awarded for its technological leadership and innovation in bringing cost-effective desalination to nations around the globe. The San Leandro, California-based company also received the European Desalination Society's prestigious Sidney Loeb Award for outstanding innovation in 2006.

Currently, ERI's patented PX® technology is making cost-efficient desalination of seawater possible in over 30 countries world-wide, covering six continents.

About ERI and the PX

Energy Recovery, Inc. (ERI) is the global leader in high efficiency energy recovery products and technology. Our PX Pressure Exchanger® (PX) energy recovery device is making desalination affordable. The PX device is rotary positive displacement pump that recovers energy from the high-pressure waste stream of SWRO desalination systems at up to 98% efficiency with no downtime or scheduled maintenance. Since its introduction in 1997, PX technology has emerged as the industry standard solution for SWRO desalination. There are currently over 5,400 PX units installed or contracted in SWRO plants worldwide, significantly reducing the cost to produce over 4.5 million cubic meters of fresh water per day, and saving customers an estimated 500 MW of energy or \$264 million a year in operating costs.

ERI's headquarters is situated in the San Francisco Bay Area; San Leandro, California USA with offices in every continent of the globe including: Sunrise, Florida; Madrid, Spain; Dubai, UAE; Shanghai, China; and service representatives in Sydney, Australia.
